

How is test data used at SSIP stakeholder meetings?

State Systemic Improvement Plan (SSIP) stakeholder meetings that include parents of students with disabilities are one way states share information and gather feedback to make informed decisions about the improvement plan.

State or district test data are often shared at these meetings. Test data provide:

- evidence of what students know and can do:
- information on how well instructional programs and policies are working;
- support for instructional decisions that helps students learn rigorous content; and
- guidance for creating policy and making decisions about how to allocate resources.

For example, a state may compare the scores between students without disabilities and students with disabilities in order to decide on an SSIP goal or target that will improve outcomes for all students.

To be active participants in stakeholder meetings, parents should ask questions when needed. For example:

- "What does that data mean?"
- "Can you say that in a different way?"
- "Why is this data important?"

Parent participation in state SSIP meetings gives them a voice to connect with others, be heard, and most importantly, gives them an opportunity to influence positive outcomes for their children and all students with disabilities!

Participants in the National Center on Educational Outcomes' (NCEO) Peer Learning Group on Empowering Families to Understand the Role of Assessments in State Systemic Improvement Plans (SSIPs) made important contributions to this series. They provided information about the issues and implications. The PLG members also reviewed drafts of this product. The final document strives to reflect their valuable comments and suggestions.

NCEO is supported through a Cooperative Agreement (#H326G210002) with the Research to Practice Division, Office of Special Education Programs, U.S. Department of Education. The Center is affiliated with the Institute on Community Integration at the College of Education and Human Development, University of Minnesota. Consistent with EDGAR §75.62, the contents were developed under the Cooperative Agreement from the U.S. Department of Education, but do not necessarily represent the policy or opinions of the U.S. Department of Education or Offices within it.
